Not illustrated. 1913 Excerpt: .the output of the factory per hour had been increased 16.2 . If the daily output of each man working 9i hr. per day was \$4.75 worth of goods for the market, what was the value of the goods produced by the man working 8 hr. per day? By the conservation of the employee s vitality and efficiency, how much productive wealth was added to the output of each man per day. HEALTH AND SANITATION 61 7. It has been authoritatively estimated that a farm hand infected with the hookworm disease is on an average 50 less efficient in his work than the well man. Estimate the loss to a county having 28,500 farmers and hired hands, each man working an average of 290 da. a year at \$1 per day, if 11 of the men are infected with the disease. To cure each man will not cost on an average over 70\$. Estimate the saving in 1 yr. from the labor of these men by curing them. 8. It has been conservatively estimated that, on an average, it takes the child who attends school in a house improperly heated, lighted, and ventilated 20 longer to complete the common-school course of 8 grades of 8 mo. each than when attending school in a house that is sanitary and comfortable in all its appointments. How much time does each child lose in completing a common-school education when compelled to attend school in an unsanitary and uncomfortable house?...
