Chelsea Green Publishing Co, United States, 2012. DVD. Book Condition: New. 226 x 152 mm. Language: English . Brand New Book. In backyards and on rooftops all over the world, the top-bar hive design is revolutionizing the art and practice of beekeeping. With top-bar hives the bees naturally construct their own wax combs rather than relying on prefabricated frames of plastic cell foundation in a typical box-type hive. And top-bar hives are now being used to raise healthy bees organically, without the use of antibiotics, miticides, or other chemical inputs. In this instructive video, New Mexico beekeeper Les Crowder shares his thirty years experience in developing best practices for working with bees in top-bar hives. Les and Heather Harrell, authors of Top-Bar Beekeeping (Chelsea Green, 2012) discuss everything from hive management techniques to how to harvest and process honey and beeswax to the best plants to grow for the foraging bees. The natural, low-stress methods outlined in this video are perfect for home or hobbyist beekeepers who have the time and interest that s necessary to manage bees intensively and holistically. The material will also be valuable for home orchardists, gardeners, and permaculture practitioners who are interested in bees as pollinators, as well as for their honey and beeswax.
