The contributors to this volume have guaranteed its survival as such by undertaking this review in order that they and others working in the field may take account of a range of agendas and initiatives. Edited by some of the key figures in educational management today, chapters examine the following key areas: Has self-management achieved the success predicted for it?; What should be the nature of professional development for educational leaders?; to what extent can education benefit by drawing from practice in business and industry?; can theory inform management practice in education? ; how can research contribute to educational improvement?; how can leaders help improve classroom practice? Educational Management is one of the major outcomes of the ESRC (Economic and Social Research Council) seminar series which aimed to redefine educational management in the light of the many developments in policy, practice, theory and research since the subject became established in the 1970s.
