

Metal Health In Australia

By Richards Macdonald

Grin Verlag Gmbh Apr 2013, 2013. Taschenbuch. Book Condition: Neu. 210x148x2 mm. This item is printed on demand - Print on Demand Titel. - Seminar paper from the year 2011 in the subject Health Science, printed single-sided, grade: A, University of California, Berkeley , language: English, abstract: Public health systems have an aim of aiding in the prevention of diseases in a country. Many diseases affect the society some of which are non-infectious chronic diseases, while others are infectious. Some of the diseases affect majority of the population in certain countries. Mental health is usually described as the way in which individuals feel, think or act as they cope with life situations. It is very important to stay mentally healthy through every stage of life. Mental illness may be as a result of disorders which are common. This paper will discuss the health care system in Australia in regard to mental health as a major concern. Statistics on the effect of mental health illness in Australia More than 20% of Australians suffer from mental illness at least ones in their lives. Some suffer from more than one form of the same. Around 20000 Australians are diagnosed of mental illness annually which raises...
