Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Linking Science and Science History with Culture - Essential Science for the Non-scientist. How might life have originated? How does life replicate and change over time? How did religion evolve and why? To what extent do our brains resemble computers? How do we remember faces, facts and figures, and how do we think laterally? Do we have a free will? What is happiness and how can we maximize it? [A] rich, intelligent . . important book . ....
